

FirePro® High Strength FireStop Compound

ROCKWOOL FirePro® HS FireStop Compound is designed to provide a fire-resisting seal around service penetrations in both fire rated wall and floor applications.

Tested to BS EN 1366:Part 3 HS FireStop compound provides up to 4 hours fire resistance.

Benefits:

- High load-bearing capacity
- Suitable with multiple service penetrations
- Can be formed into blocks
- Effective smoke and acoustic barrier
