

SP FireStop OSCB 25

Specifically designed for use only in conjunction with either ROCKWOOL RAINSCREEN DUO SLAB® or NyRock Rainscreen 032, SP FireStop OSCB 25* forms an open-state cavity fire barrier within the building façade, allowing for an open cavity of up to 25mm for ventilation and drainage.

This product provides up to 120 minutes integrity and insulation.

* Product codes for SP FireStop OSCB 25 will be supplied on receipt of order.

Prices indicated are inclusive of stainless steel pigtail screws and galvanised steel fixing brackets. These items are supplied in a box located at the bottom of a clearly marked pallet. Stainless steel brackets are available at an extra cost of £2.66 per linear metre - please specify when ordering if these are required.

Please contact the ROCKWOOL Customer Support Team for further information.

OSCB orders cannot be used to contribute towards mixed loads. These products are delivered direct from our fabrication plant. OSCB orders for less than £300 net will incur an additional charge of £25.

The lead times for these products can vary and will be confirmed on receipt of order.

* For voids equal to 425mm and up to 600mm a minimum thickness of 300mm of Rainscreen Duo Slab/NyRock Rainscreen 032 is required both above and below the cavity barrier.
