

SP FireStop OSCB 44

Specifically designed for use only in conjunction with either ROCKWOOL RAINSCREEN DUO SLAB® or NyRock Rainscreen 032, SP FireStop OSCB 44* forms an open-state cavity fire barrier within the building façade, allowing for an open cavity of up to 44mm for ventilation and drainage.

This product provides up to 120 minutes integrity and insulation.

* Product codes for the OSCB 44 will be supplied on receipt of the order.

Prices indicated are inclusive of galvanised steel fixing brackets. OSCB 44 does not require pigtail screws. The brackets are supplied in a box located at the bottom of a clearly marked pallet. Stainless steel brackets are available at an extra cost of £2.66 per linear metre - please specify when ordering if these are required. Please contact the ROCKWOOL Customer Support Team for further information.

SP FireStop Slab®

SP FireStop Slab® has been specifically designed to form a cavity fire stop. When combined with both RAINSCREEN DUO SLAB® and SP FireStop OSCB, SP FireStop Slab® can provide an effective fire stopping solution at compartment wall junctions within rainscreen façade cavities.

The SP FireStop Slab® is suitable for cavity widths between 50mm and 400mm.

The SP FireStop Plus Slab® is suitable for cavity widths up to 600mm.

For pricing and further information please refer to page 47.
